

ira INOXMACEL

QUALITY IN ONE EASY PACKAGE

A chaque utilisation, notre produit doit faire preuve de performance. En plus de la résistance, de l'élasticité et de la durabilité que lui confèrent les matériaux de haute qualité sélectionnés, il doit être conçu, approuvé et certifié conforme pour être en contact direct et permanent avec les aliments. Et surtout... il doit être beau ! En effet, le design des objets utilisés au quotidien est très important pour la première impression des clients sur votre affaire, en plus du plaisir de pouvoir manier des petites œuvres d'art tous les jours. Toutes ces qualités ne peuvent être copiées. Toutes ces qualités se résument en un concept : **MADE IN ITALY. **MADE IN ITALY** incarne la culture de la qualité. **MADE IN ITALY** incarne un design célèbre de par le monde. Ce n'est pas par hasard que **MADE IN ITALY** incarne le mythe culinaire ! Les produits **INOX MACEL** : des merveilles au quotidien.**

*Each time it's used, our product is called to a performance. It must not only have strength, elasticity and durability bestowed by selected materials of the highest quality; but it must be designed, approved and certified to stay all the time in contact with food. And last but by no means least... it must be cool! The design of objects that are for every day use will give an important, positive impression on your customers view of your business. And you will also enjoy handling... these small works of art. All these qualities can't be copied. All these qualities can be summed up into one concept: **MADE IN ITALY**. **MADE IN ITALY** means the culture of quality. **MADE IN ITALY** means top-design throughout the world. Not by chance **MADE IN ITALY** means... a legend in the kitchen!*

INOX MACEL fournit les professionnels de la restauration, que ce soit du plus petit accessoire aux objets plus imposants et visibles par le public. Crochets, plateaux, bacs Gastronorm, ustensiles pour glaciers, paniers pour lave-vaisselles, éviers, chariots et articles pour la table. Quelle que soit votre spécialité, nos produits sont à la pointe de la performance et du style.

INOX MACEL supports the efforts of catering professionals: from the smallest accessories to the more important and flashy items to show to the public. Hooks, trays, Gastronorm containers, ice-cream tools, racks for dishwashers, sinks, trolleys and tableware. In every specialty... the top performance and style

GASTRONORM 01

Gastronorm

De haute qualité, solides et pensés pour durer dans le temps, grâce à l'épaisseur supérieure (variable de 0,7 à 1 mm) et à l'utilisation d'acier inoxydable Aisi 304. Cet acier, connu sur le marché comme 18/8 ou 18/10, est doté d'une teneur en nickel jusqu'à 10 fois plus élevée par rapport aux produits bas de gamme, qui le rend résistant à la corrosion et aux dommages causés par les agents agressifs, néanmoins communs, tels que le sel et les solvants organiques présents dans les détergents. Le lavage dans l'acide par électrolyses complète la production, une procédure spéciale normalement destinée aux instruments chirurgicaux.

Le design soigné en fait un excellent choix pour la présentation et les rend pratique à utiliser en cuisine : le "cran" présent sur les parois permet de les empiler sans les encastrer, tandis que les rayons étroits mais souples en améliorent la capacité et en facilitent le nettoyage. Résistants aux hautes et basses températures (-40°C + 300°C), ils peuvent être utilisés au four, au bain-marie, pour le stockage ou le transport des aliments encore chauds. L'utilisation de matériau de haute qualité permet une utilisation durable dans le temps : complètement inodores et ne retenant pas les saveurs, ils ne craignent pas la corrosion et les lavages fréquents en lave-vaisselle. Fabriqués dans le respect de toutes les normes EN-631, ils sont certifiés NSF, la marque de qualité la plus répandue sur le marché américain.

High quality, solid and made to last, thanks to the increased thickness (can vary from 0.7 to 1mm) and the use of stainless steel Aisi304. This steel, commercially known as 18/8 or 18/10, contains up to 10 times more nickel than low quality products; this makes it resistant to corrosion and damages caused by aggressive, but common agents like salt and organic solvents included in detergents. The production is completed by electrolysis cleaning in acid, a special procedure normally reserved for surgical instruments. The accurate design makes these Gastronorm containers a great choice for the presentation of food and very practical for the kitchen: the stacking collar on the side lets you stack them without getting them stuck inside each other, while the tight but smooth radiuses improve capacity and make them easy to clean. Resistant to high and low temperatures (-40°C, +300°C), they can be used in the oven, bain-marie and to stock or transport hot food. The use of high quality raw material makes them ideal for prolonged use: completely odourless and flavourless, they don't fear corrosion and repeated washing cycles in the dishwasher. They comply fully with standard EN-631 norms and they're certified by NSF, the best known quality mark in the American market.

Robuste, forte et indestructible, cette série d'articles parfaitement assortie est une équipe gagnante ! Gastronorm propose des articles interchangeables et empilables : l'union fait la force!

Robust, strong and indestructible. A "team" with a perfect range and above all a winner! Gastronorm is a series of interchangeable and stackable products: unity is strength.

BACS GASTRONORM AISI 304 EMPILABLES

AISI 304 GASTRONORM CONTAINERS WITH STACKING COLLAR

CARACTERISTIQUES TECHNIQUES GN AISI304

AISI304 SST GASTRONORM TECHNICAL FEATURES

LE REBORD PERMET L'EMPLAGE FACILE DES BACS SANS ENCASTREMENT. ILS SONT COMPATIBLES AVEC LES BACS GN EN POLYCARBONATE. BAINS ÉLECTROLYSE POUR TOUS LES BACS HT. 150 ET 200 OU BIEN EN ALTERNATIVE POUR LES AUTRES DIMENSIONS ; L'ÉLECTROLYSE, TYPIQUE POUR LES INSTRUMENTS CHIRURGICAUX, GARANTIT UNE FINITION PLUS LISSE ET BRILLANTE. PRODUCTION EN ACIER AISI304 QUI GARANTIT UN MAXIMUM DE RESISTANCE À LA CORROSION, UN ACIER AUTHENTIQUE ET ADAPTÉ AU CONTACT AVEC LES ALIMENTS. CHAQUE PIÈCE EST CONTRÔLÉE ET MISE OUS SACHET INDIVIDUELLEMENT POUR EN PROTÉGER LA SUPERFICIE ET L'HYGIÈNE.

The stacking collars on the walls allow to easily stack and unstack the containers without risks. Compatible with our Gastronorm polycarbonate containers. Electrolysis bath for all the height 150 and 200 containers or alternatively for the other sizes; the electrolysis, typical for surgical instruments, ensures a shinier and smoother finishing. Made in AISI 304 to ensure maximum resistance to corrosion, a high quality genuine steel perfect for food contact. Every piece is checked and packed in bags one by one to preserve the surface and the cleaning.

BACS GASTRONORM EN POLYPROPYLENE EMPILABLES

POLYPROPYLENE GASTRONORM CONTAINERS

SPÉCIFICATIONS TECHNIQUES GASTRONORM AU POLYPROPYLENE POLYPROPYLENE GASTRONORM TECHNICAL FEATURES

EMPILABLES, RANGEMENT FACILE.
IDÉALE POUR LE TRANSPORT ET STOCKAGE.
PASSAGE EN LAVE VAISSELLE GARANTI.
TEMPÉRATURE D'UTILISATION RECOMMANDÉE
EN FOUR MICROONDES +70°C.

Stackable and perfect for transport and preserving
the content. Lids are hermetic for an excellent
closing. Dishwasher safe, microwave safe.
Recommended temperatures: from -40°C to +70°C
(in the microwave).

BACS POUR GLACE 02

Ice cream containers

Réalisée en acier Aisi304 (18/10) et polycarbonate, cette ligne comprend plusieurs tailles et capacités pour répondre à toutes les demandes standards et autres. Parfaits pour la présentation dans les vitrines des glaciers et des pâtisseries, utiles à la conservation de la crème glacée dans les armoires réfrigérées. Le bord arrondi en facilite la prise tandis que les lignes étroites mais souples en améliorent la capacité et les rendent faciles à nettoyer. Accompagnés de ses accessoires comme les spatules à crème glacée avec manche de différentes couleurs et couvercles raffinés en polycarbonate transparent pour protéger et présenter le produit.

Made of stainless steel Aisi304 (18/10) and polycarbonate, together they form a complete, diverse line with a variety of measures and capacities, satisfying all kinds of requests and standards. Ideal for preserving and showcasing ice cream in gelato parlours and pastry shops. The rounded edges facilitate ease of handling, while the tight but smooth radius increases capacity and makes them easy to clean. They are supplemented with accessories, like spatulas with coloured handles and elegant, perfectly transparent polycarbonate lids, devised to preserve and showcase at the same time the ice cream.

PLATEAUX ET BACS 03

Containers and trays

Dans cette section, vous trouverez un vaste choix de bacs en acier inoxydable, pour les utilisateurs qui souhaitent un produit différent par rapport au Gastronorm classique. Il s'agit d'articles soignés dans le moindre détail, brillants et aux finitions raffinées, grâce au brossage manuel, pour agencer au mieux les vitrines et les laboratoires des pâtisseries et des boucheries. Naturellement, ces produits sont également pensés pour une utilisation intense : considérablement robustes, ils sont tous réalisés en acier Aisi304 (18/10) pour offrir la plus haute résistance à la corrosion, à l'usure et aux taches causées par la manipulation de la viande et autres aliments. Les rayons étroits et les lignes souples en améliorent la capacité et les rendent faciles à nettoyer. Les grilles en acier permettant d'égoutter les aliments en complètent la ligne.

In this section you will find a vast choice of stainless steel containers, for when you're looking for different measures than the classic Gastronorm standard. Well-finished, shiny and with great attention to detail, thanks to the hand-made polishing, they're designed to furnish showcases and laboratories of butchers, bakeries and patisseries. They are, of course, developed for intense use: remarkably robust, they're all made in stainless steel Aisi 304, in order to offer the best resistance to corrosion, wear and stains caused by processing meat and food in general. The tight but smooth radius improves capacity and makes them easy to clean. This line is completed by the stainless steel grids, used to drain the food.

ARTICLES POUR LA TABLE 04

Tableware

Colorés ou transparents, ils ont été créés au fil des années pour répondre aux exigences de plus en plus pressantes en matière de sécurité, de praticité et de commodité auxquelles le plastique peut répondre. Verres, carafes, assiettes et cloches, plateaux en plastique représentent l'alternative parfaite aux matériaux fragiles tels que la céramique et le verre dans les discothèques, les piscines, les hôpitaux, les locaux en plein air... grâce à leur durabilité et leur résistance aux chocs et à la rupture. Ces matériaux offrent par ailleurs une épargne considérable par rapport aux matériaux traditionnels. Conçus pour être pratiques : à l'extérieur, des surfaces striées anti-rayures et antiglisse, à l'intérieur lisses pour un nettoyage parfait ; lavables en lave-vaisselle. Transparents comme le verre ou aux couleurs brillantes, ils s'adaptent à tous les contextes.

Colourful or transparent, they were created over the years to answer the ever growing demand for safe, handy and convenient products that only plastic can provide. Glasses, pitchers, plates and plate-covers, trays... these are the ideal substitutes for fragile materials like ceramic or glass, especially in clubs, pubs, swimming pools, hospitals and open spaces in general, thanks to the fact that they're so hard to break, and not as dangerous. Good value for price compared to traditional materials. Dishwasher safe, on the outside, a milling surface offer a better grip and hides scratches; on the inside, the smooth surfaces and lack of corners make them easy to clean. Transparent like glass or in bright colours, they fit in all situations.

Sinks

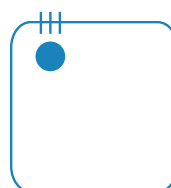

Adaptés à toutes les cuisines et productions, les éviers en acier sont réalisés en Aisi304, le meilleur matériau pour garantir une résistance totale à la rouille, aux taches, aux produits de nettoyage les plus agressifs et aux changements de température. Élégants et brillants, aux lignes classiques et souples pour un nettoyage aisé, dotés de rayons étroits qui en optimisent la capacité. La solidité et la pureté des matériaux utilisés en garantissent la résistance et l'hygiène dans le temps. Disponibilité de toutes les combinaisons de fond foré et de trop-plein et dotés d'accessoires sur demande.

Apt for any kitchen or production, the stainless steel sinks are made in Aisi304, the best material to ensure a total resistance to rust, stains and the most aggressive cleaning product, and to high temperatures and related surges. Elegant and shiny, with a classic and smooth design that makes them easy to clean and tight radius for a better capacity. The strength and purity of the raw material used guarantees hygiene and resistance to wear over time. On request, all possible combinations of bottom holes and overflows and related accessories are available.

CHARIOTS 06

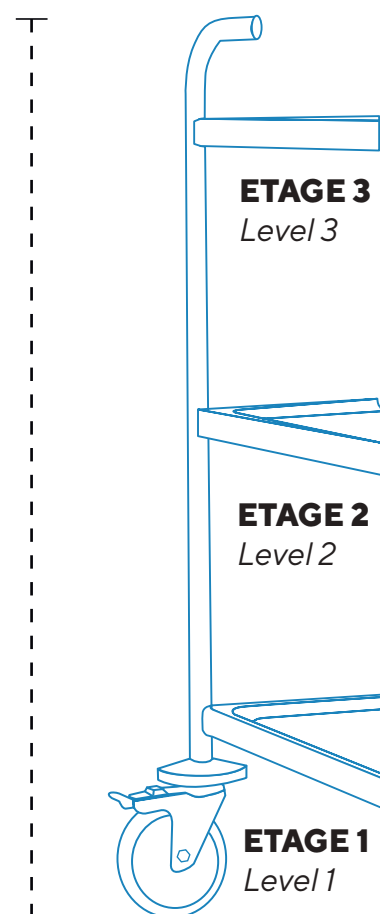

Trolleys

Un vaste choix de chariots d'excellente qualité, pensés sur mesure pour le transport de tous les produits présents dans une grande cuisine : plaques Gastronorm, plateaux, paniers pour lave-vaisselle, récipients 60×40... Une flexibilité totale pour réaliser des modèles même sur mesure. Réalisés uniquement en acier robuste Aisi304 (18/10), le meilleur acier pour l'hygiène et la résistance aux dommages causés par le temps et pour un produit conçu pour résister aux charges de plus d'un quintal. Disponibles déjà soudés ou à monter et avec une attention particulière aux détails : roues en nylon ou en caoutchouc insonorisées, équipées de freins et de pare-chocs ; caoutchouc insonorisant sous chaque rayon pour prévenir les bruits et les vibrations gênants ; surfaces lisses et sans saillies cachées pour un nettoyage aisé et une plus grande sécurité ; plans aux bords relevés pour prévenir les débordements pendant le transport.

An ample selection of excellent trolleys, tailor-made to transport all the typical products of a professional kitchen: Gastronorm containers, trays, dishwasher racks, 60×40 containers. We have total flexibility, to the point that we can produce customised models. Made only with solid Aisi304 stainless steel, the best material for hygiene and resistance to wear, products are designed to carry substantial loads of a 100kg and more. Available already welded or flat-packed to save space, they come with a variety of accessories and care for details: soundproof wheels made of nylon or rubber, with brakes and buffers to soften bumps; sound-deadening rubber under each shelf to soften annoying noises and vibrations; smooth surfaces without hidden corners or sharp edges for easier cleaning and better safety; shelves with raised borders to stop things from sliding off during transport.

Customized models available.

CROCHETS 07

Hooks

C'est ici que se fondent l'origine et l'histoire de la production Inox Macel. Les crochets sont disponibles dans de nombreuses variantes et formes et peuvent être réalisés sur mesure. Disponibles en acier 420 ou 304 sur demande, ils ne craignent pas les charges importantes et les agents agressifs typiques du travail de la viande. Faciles à manipuler grâce à la surface lisse et à l'épaisseur importante, ils peuvent être fabriqués avec ou sans pointes en fonction de l'utilisation et pour une plus grande sécurité. Tous les accessoires les plus communs pour l'activité d'une boucherie en complètent la ligne : des scies aux attendrisseurs de viande, des broches aux pinces.

Inox Macel's origins and production history start here. The hooks are available in many forms and variants and they can be made to customer's design. Available in Aisi420 or 304 on request, they don't fear high loads and the aggressive elements typical of meat processing. Easy to handle thanks to the smooth surface and high thickness, they can be made with or without pointy ends according to desired use and better safety. The line is completed with the typical accessories needed in every butcher shop: from hacksaws to meat pounders, from skewers to pincers.

CASIERS 08

Racks for dishwashers

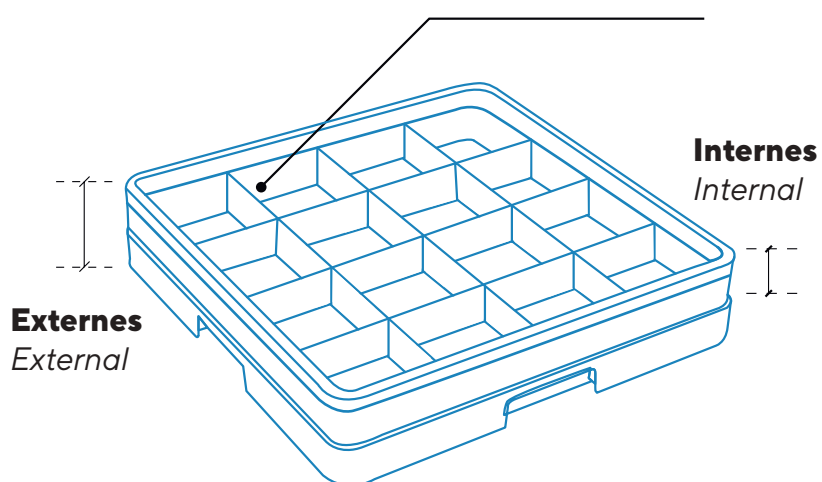

Casiers industriels robustes de différentes dimensions et modèles pour laver, ranger et transporter tout type de vaisselle et verres, aptes aux différents standards. Le fond et les côtés ouverts sous forme de "grille" sont étudiés sur le terrain et avec des simulations à l'ordinateur pour permettre un flux parfait pendant le lavage et offrir un meilleur résultat sans gaspillage d'eau ; ces ouvertures facilitent les flux d'air chaud pendant le séchage et la "fraîcheur" des articles à l'intérieur. En cas de dépôt prolongé, les paniers peuvent être protégés contre les agents externes à l'aide de toiles et de couvercles sur mesure. Réalisés en PP alimentaire de haute qualité, le meilleur matériau pour un produit solide mais léger, hygiénique et résistant aux impacts et aux agents chimiques agressifs et aux différences de température (jusqu'à 95°C) typiques des lavages intenses d'une grande cuisine. Le bord supérieur et la forme du fond sont pensés pour les empiler de manière stable et aisée. Les poignées incorporées sur tous les côtés, les surfaces lisses et les coins arrondis les rendent sûrs et maniables ; facilement transportables grâce également aux chariots sur mesure, avec et sans poignées.

Robust, industrial racks of different models and sizes to wash, store and transport any sort of dishes and glasses. The open "grids" on the bottom and the sides are designed to allow a perfect flow during washing, for a better result without wasting water; they're both tested on the field and with computer simulations. These openings facilitate the influx of hot air during drying so that the content is also well ventilated and subject to "fresh" air. To store content for a long time, the racks can be protected by external agents with our tailor-made covers. Made with high-quality, food contact safe PP, the best material for a product that is both light and strong, hygienic, and resistant to impacts, aggressive chemicals and temperature surges (even up to 95°C): all typical of a professional, intense washing cycles. The upper edge and shape at the bottom are made to stack them easily and firmly. The incorporated handles, smooth surfaces and rounded corners make them safe and easy to handle; transport is made easy by the customized trolleys, with or without handles.

LE MISURE MOSTRATE SONO QUELLE ESATTE DEGLI SCOMPARTI. PER UN LAVORO PIÙ AGEVOLE, RACCOMANDIAMO DI UTILIZZARE SCOMPARTI UN PO' PIÙ GRANDI DEI BICCHIERI IN USO.

The measurements shown are of the exact size of each compartment. For easier handling, we recommend to place the glasses in compartments that are a bit bigger than the glass diameter.

La société Inox Macel a vu le jour au début des années 1980, quand la famille Salvi s'impose sur le marché avec des articles destinés aux boucheries, petites et grandes. Dès les premières années, la société a étendu ses affaires au-delà du pays. La gamme de produits s'est elle aussi rapidement agrandie : plateaux, bacs, ustensiles pour glaciers et plus encore. Cette évolution permanente a fait d'Inox Macel la société de référence en matière d'acier inoxydable, en quelques années et ce jusqu'à nos jours. En participant à toutes les manifestations mondiales les plus importantes du domaine, que ce soit en Italie, en Europe, au Moyen ou en Extrême Orient, ou en Amérique, la société s'est inscrite sur tous les marchés du monde, devenant ainsi une des entreprises leaders de l'industrie. MADE IN ITALY est le concept qui résume parfaitement la philosophie d'INOX MACEL : des matériaux de qualité, résistants et durables, et un design italien.

INOX MACEL was founded in the early 80's, when the Salvi family began offering products aimed at small and large butchers. Already in the first years the company expanded its business beyond national borders. The production line soon expanded: trays, containers, articles for ice-cream shops and more. A continuous evolution that brought INOX MACEL to a steady growth over the years. With connections developed at the most important fairs and shows in Italy, Europe, Asia and America, INOX MACEL is active in every continent, and can be considered one of the most important company in the sector.

MADE IN ITALY is the concept that summarizes best our corporate philosophy: high quality materials, durability, Italian design.

CERTIFICATIONS: la Maison INOX MACEL a la certification ISO9001 2015 pour le projet et la production d'articles destinés aux aliments. NSF certifie la qualité des produits qui sont rigoureusement testés dans les laboratoires CSI selon toutes les dispositions des lois italiennes et européennes.

MARCHES ETRANGERS: les réseaux de vente sont exclusivement constitués d'importateurs-distributeurs que ce soit en Italie ou à l'étranger. Les produits Inox Macel sont distribués dans les meilleurs hôtels, restaurants et grossistes du monde entier.

CERTIFICATES: Our company is ISO9001:2015 certified for design and production of goods intended for food contact. NSF certifies the product high quality, while CSI independent laboratories rigorously test them accordingly with all Italian and EU rules and regulations.

OVERSEAS: Our sales network is made of importers/distributors in Italy and abroad. INOX MACEL products are distributed to the best hotels, restaurants, wholesalers around the world.

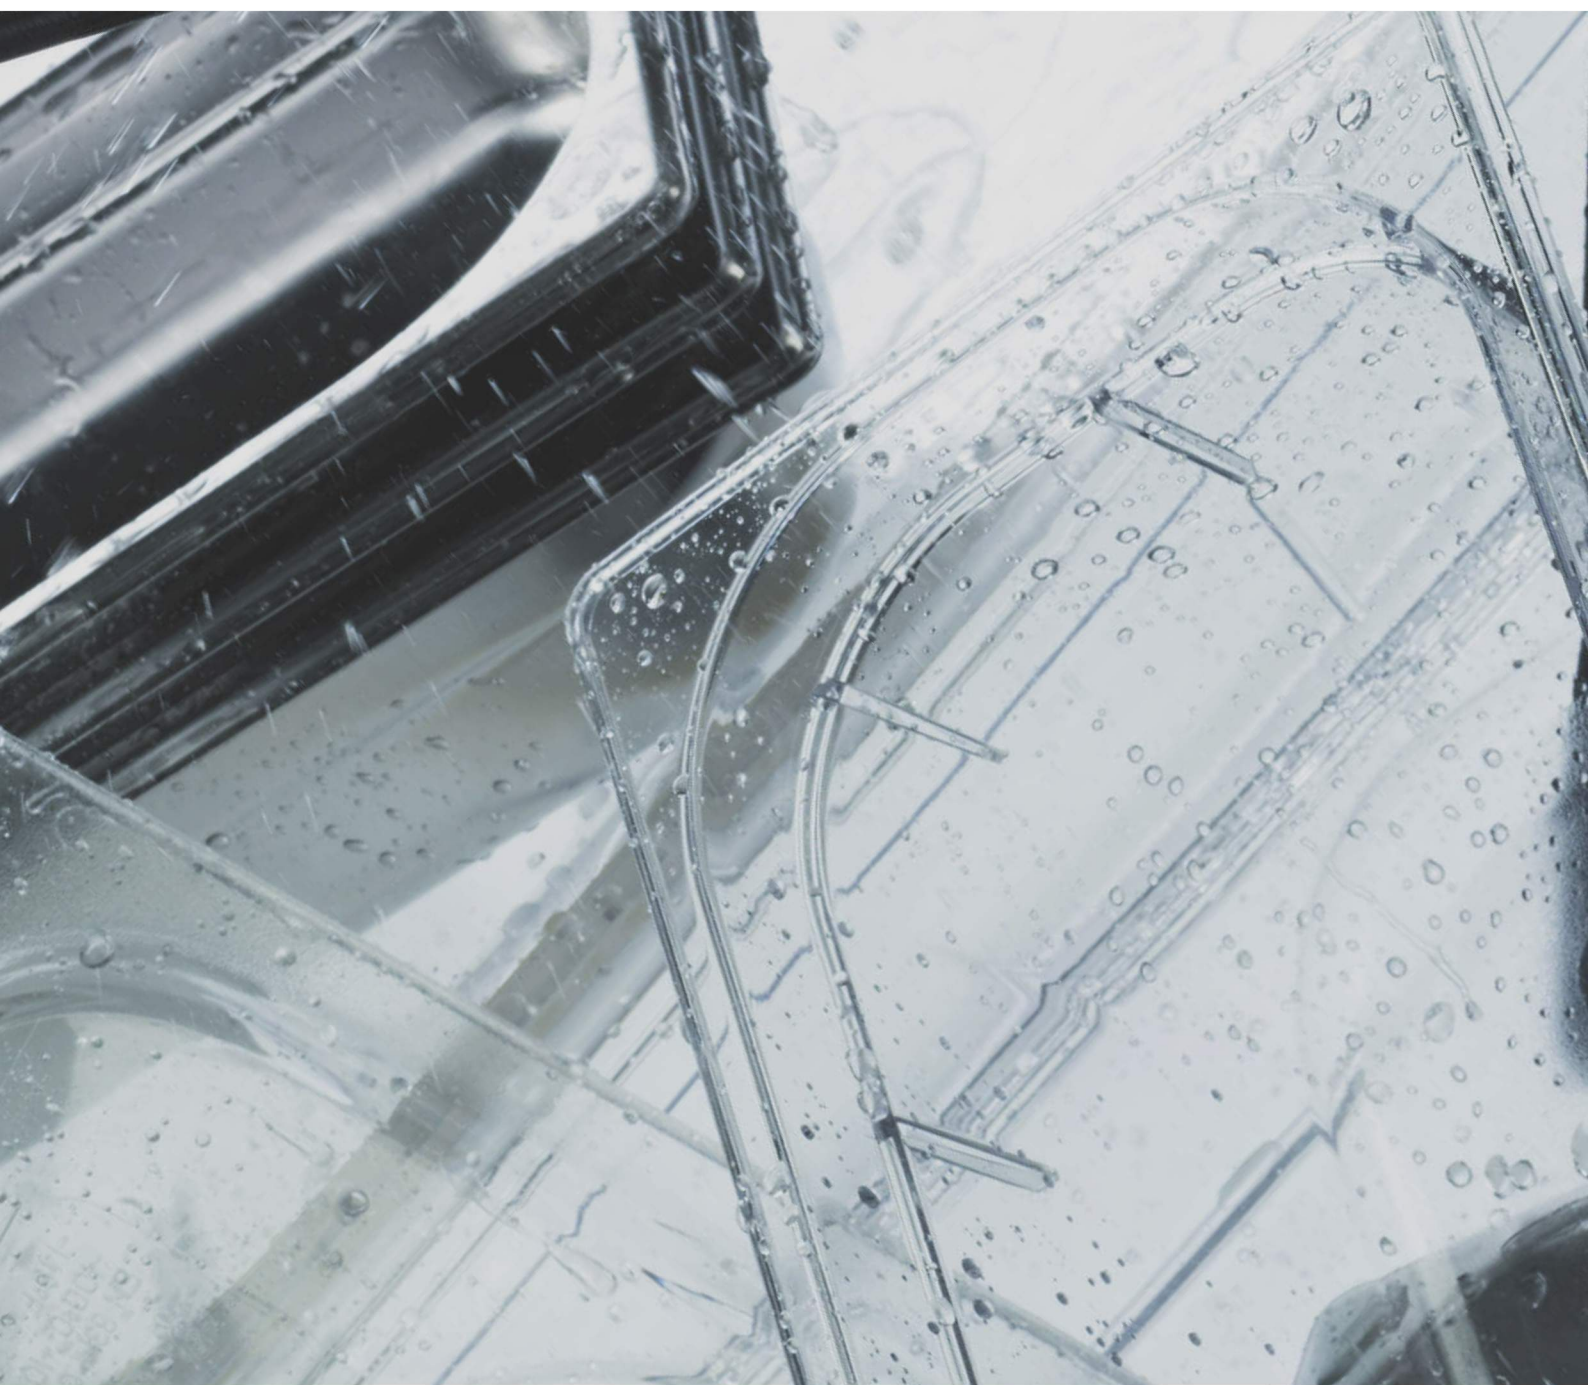

See www.nsf.org for additional info and the complete list of certified products

QUALITY IN ONE EASY PACKAGE

Ogni volta che viene usato, un nostro prodotto è chiamato ad una performance. Non solo deve avere resistenza, elasticità e durata nel tempo conferitegli da materiali selezionati della massima qualità, deve essere pensato, approvato e certificato per stare a stretto e duraturo contatto con alimenti. E, non ultimo, deve essere...bello! Sì, perché il design degli oggetti che ogni giorno userete ed esporrete, contribuisce in modo importante all'impressione positiva che la clientela avrà della vostra attività ed anche al vostro piacere quotidiano di svolgere la professione maneggiando... piccoli capolavori. Tutte queste qualità non si improvvisano copiandole. Tutte queste qualità si riassumono in un concetto: **MADE IN ITALY. **MADE IN ITALY** vuol dire cultura della qualità. **MADE IN ITALY** vuol dire il top-design famoso nel mondo. E non a caso **MADE IN ITALY** vuol dire... un mito in cucina!**

*Each time it's used, our product is called to a performance. It must not only have strength, elasticity and durability bestowed by selected materials of the highest quality; but it must be designed, approved and certified to stay all the time in contact with food. And last but by no means least... it must be cool! The design of objects that are for every day use will give an important, positive impression on your customers view of your business. And you will also enjoy handling... these small works of art. All these qualities can't be copied. All these qualities can be summed up into one concept: **MADE IN ITALY**. **MADE IN ITALY** means the culture of quality. **MADE IN ITALY** means top-design throughout the world. Not by chance **MADE IN ITALY** means... a legend in the kitchen!*

INOX MACEL condivide il lavoro dei professionisti della ristorazione: dai più piccoli accessori agli oggetti più importanti e vistosi da esporre al pubblico. Ganci, vassoi, serie Gastronorm, gelateria, cestelli per lavastoviglie, lavelli, carrelli e articoli per la tavola. In ogni specialità... il top della performance e dello stile.

INOX MACEL supports the efforts of catering professionals: from the smallest accessories to the more important and flashy items to show to the public. Hooks, trays, Gastronorm containers, ice-cream tools, racks for dishwashers, sinks, trolleys and tableware. In every specialty... the top performance and style.

QUALITY IN ONE EASY PACKAGE

Ice-cream containers

Stainless steel trays and containers

A vibrant display of fresh vegetables and prepared food items. In the foreground, a white plate holds a salad of sliced cucumbers, cherry tomatoes, and red bell peppers. To its right is a long, golden-brown loaf of bread. Behind the plate, a red tray contains a bowl of green peas and two golden-brown fried items. Scattered around the peas are small, light-colored seeds. In the background, a wooden tray holds more fresh produce, including whole tomatoes, cucumbers, and a halved pumpkin. To the right, a head of broccoli is visible. The entire scene is set against a light green background.

GASTRONORM 01

Gastronorm

Di alta qualità, solide e pensate per durare nel tempo, grazie allo spessore superiore (variabile da 0,7 a 1mm) e all'utilizzo di acciaio inossidabile Aisi 304. Questo acciaio, noto commercialmente come 18/8 o 18/10, è dotato di un contenuto di nickel fino a 10 volte più alto che nei prodotti di bassa qualità, che lo rende resistente alla corrosione e ai danni causati da agenti aggressivi, ma comuni, come sale e solventi organici presenti nei detergenti. Completa la produzione il lavaggio in acido per elettrolisi, un procedimento speciale normalmente riservato per gli strumenti chirurgici. Il design curato le rende un'ottima scelta per la presentazione e pratiche per l'uso in cucina: il "gradino" presente sulle pareti permette di impilarle senza rischio di incastrarle, mentre i raggi stretti ma morbidi ne migliorano la capienza e le rendono facili da pulire. Resistenti alle alte e basse temperature (-40°C + 300°C), possono essere utilizzate nel forno, bagnomaria, per lo stoccaggio o il trasporto del cibo ancora caldo. L'uso di materiale di alta qualità le rendono ideali per un uso prolungato nel tempo: completamente inodori e insapori, non temono la corrosione e lavaggi ripetuti in lavastoviglie. Prodotte nel rispetto di tutte le norme dello standard EN-631, sono certificate NSF, il marchio di qualità più noto sul mercato americano.

High quality, solid and made to last, thanks to the increased thickness (can vary from 0.7 to 1mm) and the use of stainless steel Aisi304. This steel, commercially known as 18/8 or 18/10, contains up to 10 times more nickel than low quality products; this makes it resistant to corrosion and damages caused by aggressive, but common agents like salt and organic solvents included in detergents. The production is completed by electrolysis cleaning in acid, a special procedure normally reserved for surgical instruments. The accurate design makes these Gastronorm containers a great choice for the presentation of food and very practical for the kitchen: the stacking collar on the side lets you stack them without getting them stuck inside each other, while the tight but smooth radiuses improve capacity and make them easy to clean. Resistant to high and low temperatures (-40°C, +300°C), they can be used in the oven, bain-marie and to stock or transport hot food. The use of high quality raw material makes them ideal for prolonged use: completely odourless and flavourless, they don't fear corrosion and repeated washing cycles in the dishwasher. They comply fully with standard EN-631 norms and they're certified by NSF, the best known quality mark in the American market.

Con gradino
With raised rim

Senza gradino
With flat rim

Robuste, forti e indistruttibili. Una "squadra" perfettamente assortita e soprattutto...vincente! Gastronorm è una serie di prodotti sovrapponibili e impilabili: l'unione fa la forza.

Robust, strong and indestructible. A "team" with a perfect range and above all a winner! Gastronorm is a series of interchangeable and stackable products: unity is strength.

CONTENITORI GASTRONORM AISI 304 CON GRADINO DI IMPILABILITÀ

AISI 304 GASTRONORM CONTAINERS WITH STACKING COLLAR

CARATTERISTICHE TECNICHE GASTRONORM ACCIAIO INOX AISI 304 AISI304 SST GASTRONORM TECHNICAL FEATURES

IL GRADINO DI SOVRAPPONIBILITÀ PERMETTE D'IMPIILARE FACILMENTE LE BACINELLE SENZA CHE SI INCASTRINO TRA DI LORO. COMPATIBILI CON I CONTENITORI GASTRONORM IN POLICARBONATO. BAGNO IN ELETTROLISI PER TUTTI I CONTENITORI ALTEZZA 150 E 200 O IN ALTERNATIVA PER LE ALTRE MISURE; L'ELETTROLISI, TIPICA PER GLI STRUMENTI CHIRURGICI, OFFRE UNA FINITURA PIÙ LISCIA E LUCIDA. PRODOTTE IN AISI 304 PER GARANTIRE MASSIMA RESISTENZA ALLA CORROSIONE, UN ACCIAIO AUTENTICO E ADATTO AL CONTATTO CON ALIMENTI. OGNI PEZZO VIENE CONTROLLATO E INSACCHETTATO UNO AD UNO PER PRESERVARNE LA SUPERFICIE E LA PULIZIA.

The stacking collars on the walls allow to easily stack and unstack the containers without risks. Compatible with our Gastronorm polycarbonate containers. Electrolysis bath for all the height 150 and 200 containers or alternatively for the other sizes; the electrolysis, typical for surgical instruments, ensures a shinier and smoother finishing. Made in AISI 304 to ensure maximum resistance to corrosion, a high quality genuine steel perfect for food contact. Every piece is checked and packed in bags one by one to preserve the surface and the cleaning.

BACINELLE GELATO 02

Ice cream basins

Realizzate in acciaio Aisi304 e policarbonato, compongono una linea completa di svariate misure e capacità, in modo da rispondere a tutte le possibili richieste e standard. Ideali per la presentazione nelle vetrine di gelaterie e pasticcerie e funzionali per la conservazione del gelato negli armadi frigo. Il bordo arrotondato rende facile la presa, mentre le linee strette ma morbide migliorano la capienza e le rendono facili da pulire. Complete di accessori, come spatole del gelato dal manico di vari colori ed eleganti coperchi in policarbonato dalla notevole trasparenza per proteggere e presentare allo stesso tempo il gelato.

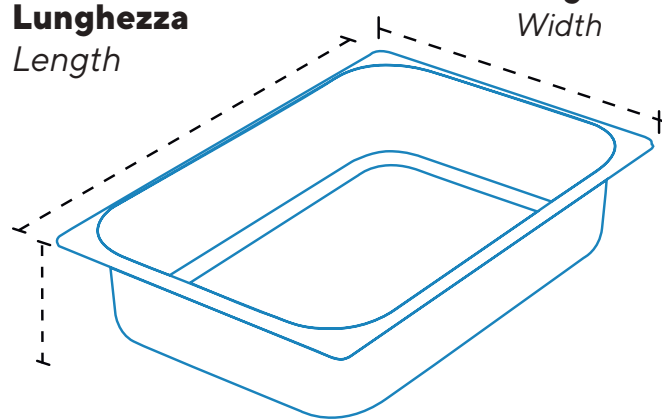

Made of stainless steel Aisi304 and polycarbonate, together they form a complete, diverse line with a variety of measures and capacities, satisfying all kinds of requests and standards. Ideal for preserving and showcasing ice cream in gelato parlours and pastry shops. The rounded edges facilitate ease of handling, while the tight but smooth radiuses increase capacity and make them easy to clean. They are supplemented with accessories, like spatulas with coloured handles and elegant, perfectly transparent polycarbonate lids, devised to preserve and showcase at the same time the icecream.

CONTENITORI E VASSOI 03

Containers and trays

In questa sezione trovate una vasta scelta di contenitori e vassoi in acciaio inossidabile, per chi vuole qualcosa di diverso dal classico standard Gastronorm. Sono articoli molto curati, lucenti e con una grande attenzione alle finiture, grazie alla spazzolatura a mano, così da arredare al meglio le vetrine e i laboratori di pasticcerie e macellerie. Naturalmente sono anche pensati per l'uso intenso: notevolmente robusti, sono tutti realizzati in acciaio Aisi304, così da offrire la massima resistenza alla corrosione, all'usura e alle macchie causate dalla lavorazione della carne e del cibo in generale. I raggi stretti e le linee morbide migliorano la capienza e le rendono facili da pulire. Completano la linea le griglie in acciaio per sgocciolare il cibo.

In this section you will find a vast choice of stainless steel containers and trays, for when you're looking for different measures than the classic Gastronorm standard. Well-finished, shiny and with great attention to detail, thanks to the hand-made polishing, they're designed to furnish showcases and laboratories of butchers, bakeries and patisseries. They are, of course, developed for intense use: remarkably robust, they're all made in stainless steel Aisi 304, in order to offer the best resistance to corrosion, wear and stains caused by processing meat and food in general. The tight but smooth radius improves capacity and makes them easy to clean. This line is completed by the stainless steel grids, used to drain the food.

ARTICOLI PER LA TAVOLA 04

Tableware

Colorati o trasparenti, sono nati negli anni per rispondere alle sempre più diffuse esigenze di sicurezza, praticità e convenienza a cui la plastica può rispondere. Bicchieri, brocche, piatti e copripiatti, vassoi in plastica sono ideali sostituti di materiali fragili come ceramica e vetro in luoghi come discoteche, piscine, ospedali, locali all'aperto... grazie alla loro durabilità e resistenza agli urti e alla rottura. Offrono anche un notevole risparmio rispetto ai materiali tradizionali. Pensati per essere comodi: all'esterno superfici zigrinate antigraffio e antiscivolo, all'interno lisce per una facile pulizia; lavabili in lavastoviglie. Trasparenti come vetro o con colori brillanti, si adattano a tutti i contesti.

Colourful or transparent, they were created over the years to answer the ever growing demand for safe, handy and convenient products that only plastic can provide. Glasses, pitchers, plates and plate-covers, trays made of plastic; these are the ideal substitutes for fragile materials like ceramic or glass, especially in clubs, pubs, swimming pools, hospitals and open spaces in general, thanks to the fact that they're so hard to break, and not as dangerous. On top of that, they also offer value for money when compared with traditional materials. Developed to be "easy": on the outside, milling surfaces offer a better grip and hide scratches; on the inside, the smooth surfaces and lack of corners make them easy to clean. They're also dishwasher safe. Transparent like glass or in bright colours, they fit in all situations.

Sinks

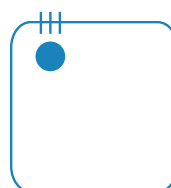

Adatti per qualsiasi cucina e produzione, i lavelli in acciaio sono realizzati in Aisi304 (18/10), il miglior materiale per assicurare una totale resistenza alla ruggine, alle macchie e ai prodotti di pulizia più aggressivi, alle alte temperature e ai relativi sbalzi. Eleganti e lucenti, dalle linee classiche e morbide per una facile pulizia, dotati di raggi stretti che ne migliorano la capienza. La solidità e la purezza dei materiali utilizzati ne garantiscono resistenza e igienicità nel tempo. Disponibili tutte le combinazioni di foro fondo e troppopieno e dotate di accessori su richiesta.

Apt for any kitchen or production, the stainless steel sinks are made in Aisi304, the best material to insure a total resistance to rust, stains and the most aggressive cleaning product, and to high temperatures and related surges. Elegant and shiny, with a classic and smooth design that makes them easy to clean and tight radius for a better capacity. The strength and purity of the raw material used guarantees hygiene and resistance to wear over time. On request, all possible combinations of bottom holes and overflows and related accessories are available.

CARRELLI 06

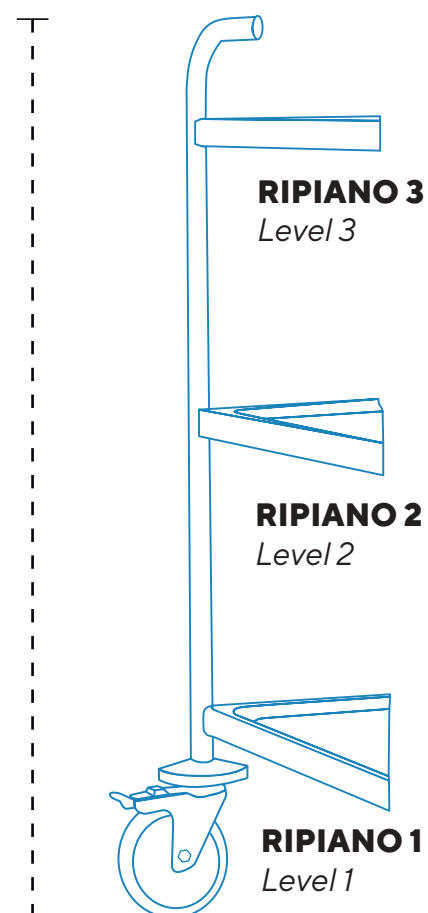

Trolleys

Una vasta scelta di carrelli di ottima qualità, pensati su misura per il trasporto di tutti i prodotti che circolano in una grande cucina: teglie gastronorm, vassoi, cestelli per lavastoviglie, contenitori 60×40... Una totale flessibilità, tale da poter realizzare anche modelli su misura. Realizzati solo in solido acciaio Aisi304, il miglior acciaio per igienicità e resistenza ai danni del tempo e per un prodotto pensato per resistere a carichi elevati da oltre il quintale o più. Disponibili sia già saldati che da montare, e con una speciale attenzione ai dettagli: ruote in nylon o in gomma insonorizzate, dotate di freni e paracolpi per ammortizzare gli urti; gomma antirombo sotto ogni ripiano per prevenire fastidiosi rumori e vibrazioni; superfici lisce e senza angoli nascosti o spigoli per una semplice pulizia e maggiore sicurezza; ripiani dai bordi rialzati per prevenire che nulla fuoriesca durante il trasporto.

An ample selection of excellent trolleys, tailor-made to transport all the typical products of a professional kitchen: Gastronorm containers, trays, dishwasher racks, 60×40 containers. We can offer total flexibility, to the point that we can produce customised models. Made only with solid, high thickness Aisi304 stainless steel (18/10), the best material for hygiene and resistance to wear; designed to easily carry substantial loads of a 100kg and more. Available as welded or to be built and flat-packed to save space, they come with a variety of accessories and care for details: soundproof wheels made of nylon or rubber, with brakes and buffers to soften bumps; sound-deadening rubber under each shelf to soften annoying noises and vibrations; smooth surfaces without hidden corners or sharp edges for easier cleaning and better safety; shelves with raised borders to stop things from sliding off during transport.

CARATTERISTICHE TECNICHE CARRELLI ACCIAIO INOX

SST TROLLEYS TECHNICAL FEATURES

PRODOTTI IN ACCIAIO AISI304 PER LA MIGLIORE RESISTENZA ALLA CORROSIONE;
IDEALE PER IL CONTATTO CON GLI ALIMENTI.

Made in AISI 304 to ensure maximum resistance to corrosion, a high quality
genuine steel perfect for food contact.

CAPACITÀ DI CARICO TRA LE PIÙ ALTE SUL MERCATO; 4 RUOTE GIREVOLI INSONORIZZATE,
Ø 125MM, DI CUI DUE COL FRENO. SI REALIZZANO ANCHE MODELLI SU MISURA.

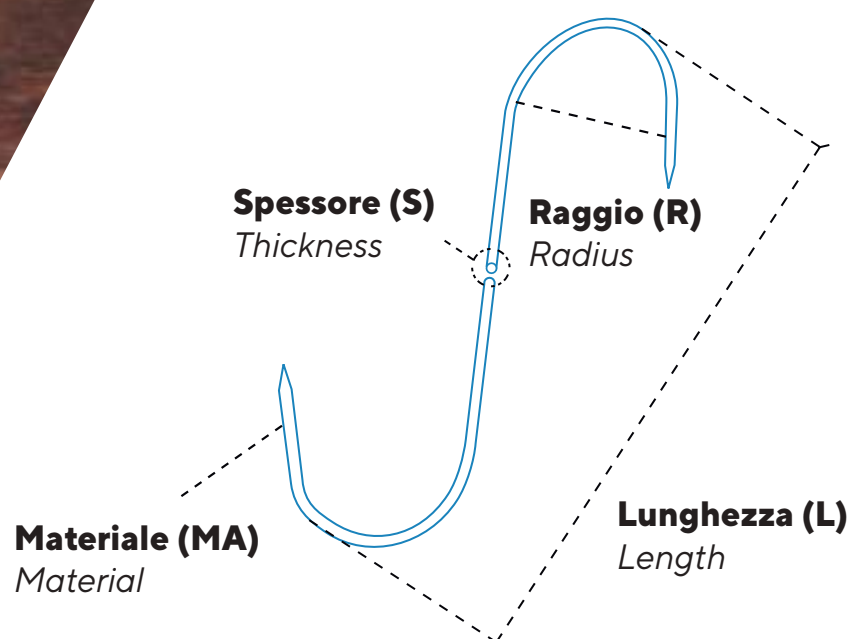

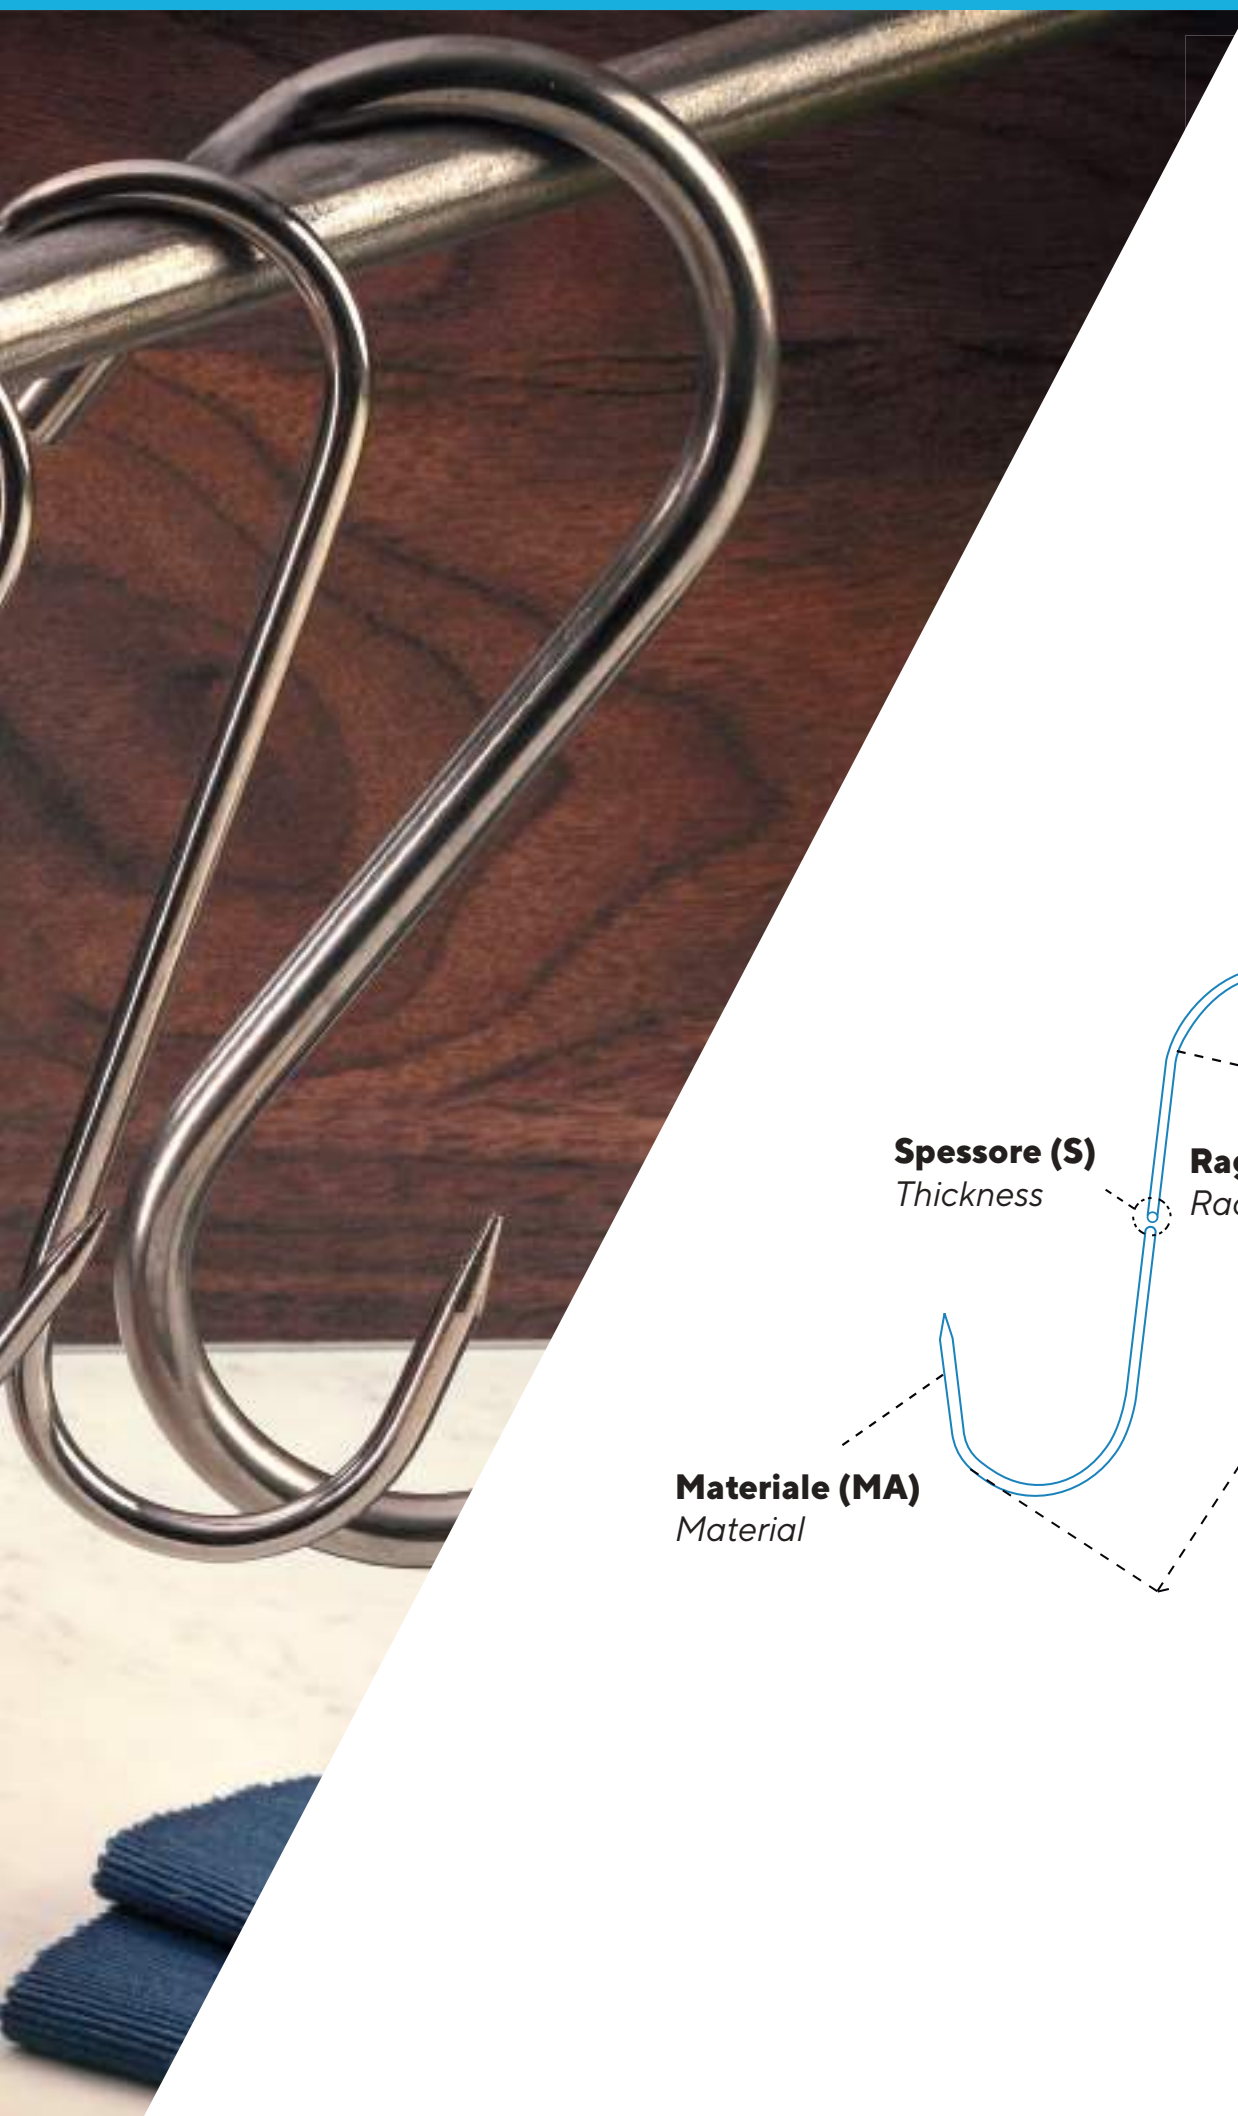

Load capacity among the highest in the market; 4 revolving soundproof wheels, Ø 125mm (two with
brakes). Customized models available.

GANCI 07

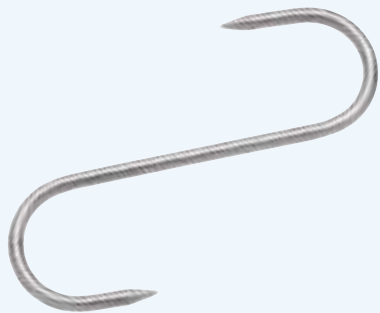

Hooks

L'origine e la storia della produzione Inox Macel parte da qui. I ganci sono disponibili in tantissime varianti e forme e possono essere realizzati su misura. Disponibili in acciaio Aisi420 o Aisi304 su richiesta, non temono i carichi pesanti e gli agenti aggressivi tipici del lavoro della carne. Facili da maneggiare grazie alla superficie liscia e all'ampio spessore, possono essere prodotti con o senza punte a seconda dell'uso e per maggiore sicurezza. Completano la linea tutti gli accessori più comuni per l'attività di una macelleria: dai seghetti ai batticarne, dagli spiedini alle pinze.

Inox Macel's origins and production history start here. The hooks are available in many forms and variants and they can be made to customer's design. Available in Aisi420 or 304 on request, they don't fear high loads and the aggressive elements typical of meat processing. Easy to handle thanks to the smooth surface and high thickness, they can be made with or without pointy ends according to desired use and better safety. The line is completed with the typical accessories needed in every butcher shop: from hacksaws to meat pounders, from skewers to pincers.

GANCIO FISSO A 2 PUNTE TWO POINTS FIXED HOOK

CESTELLI 08

Racks

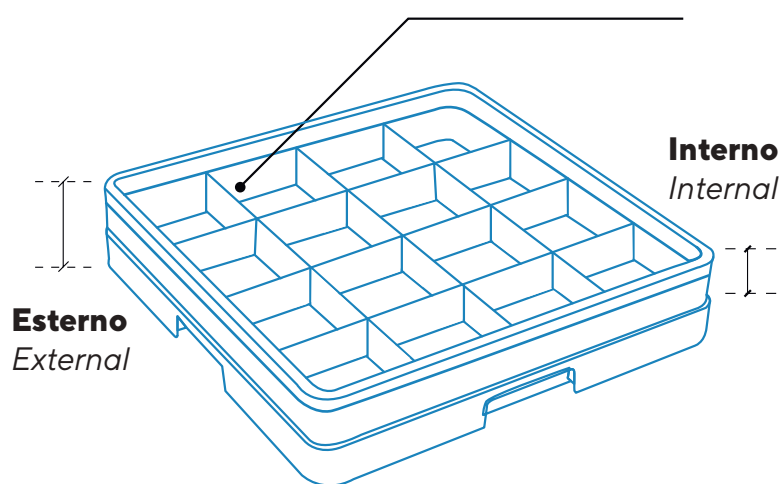

Robusti cestelli professionali in polipropilene di svariate misure e modelli per lavare, riporre e trasportare qualsiasi tipo di stoviglia e bicchiere, adatti a multipli standard. Il fondo e i lati aperti "a griglia" sono studiati sul campo e con simulazione al computer per permettere un perfetto flusso durante il lavaggio, offrendo un migliore risultato senza sprechi d'acqua; queste aperture facilitano anche i flussi d'aria calda durante l'asciugatura e la "freschezza" degli articoli all'interno. In caso di deposito per lungo tempo, i cestelli possono essere protetti da agenti esterni con teli e coperchi su misura. Realizzati in polipropilene alimentare di alta qualità, il materiale migliore per un prodotto solido ma leggero, igienico e resistente agli impatti e ad agenti chimici aggressivi e agli sbalzi di temperatura (anche a 100°C) tipici dei lavaggi intensi di una grande cucina. Il bordo superiore e l'invito sul fondo sono pensati per impilarli stabilmente e con facilità tra loro. Le maniglie incorporate su tutti i lati, le superfici lisce e gli angoli arrotondati li rendono sicuri e maneggevoli; facilmente trasportabili grazie anche ai carrelli su misura, con e senza maniglia.

Robust professional polypropylene racks of different models and sizes to wash, store and transport any sort of dishes and glasses. The open "grids" on the bottom and the sides are designed to allow a perfect flow during washing, for a better result without wasting water; they're tested on the field and with computer simulations. These openings facilitate the circulation of air, useful while drying and to keep the content "fresh". To store the content for a long time, the racks can be protected by external agents with our tailor-made cover and lid. Made with high quality, food contact safe polypropylene, the best material for a product that needs to be both light and strong, hygienic, and resistant to impacts, chemicals and temperature surges (even up to 100°C): all typical of a professional dishwasher and its intense washing cycles. The upper edge and shape at the bottom are made to stack them easily and firmly on each other. The incorporated handles, smooth surfaces and rounded corners make them safe and easy to handle; transport is made easy by the customized trolleys, with or without handles.

LE MISURE MOSTRATE SONO QUELLE ESATTE DEGLI SCOMPARTI. PER UN LAVORO PIÙ AGEVOLE, RACCOMANDIAMO DI UTILIZZARE SCOMPARTI UN PO' PIÙ GRANDI DEI BICCHIERI IN USO.

The measurements shown are of the exact size of each compartment. For easier handling, we recommend to place the glasses in compartments that are a bit bigger than the glass diameter.

L'azienda Inox Macel nasce nei primi anni '80, quando la famiglia Salvi inizia ad affermarsi con articoli rivolti alle piccole e grandi macellerie. Già nei primissimi anni di attività la ditta allarga il proprio commercio oltre i confini nazionali. Anche la gamma di produzione viene ben presto ampliata: vassoi, contenitori ed articoli per gelateria ed altro ancora; una continua evoluzione che ha portato negli anni a una costante crescita per l'azienda. Con relazioni sviluppate alle più importanti manifestazioni fieristiche del settore in Italia, Europa, Asia ed America, la Inox Macel è attiva in tutti i continenti e può essere considerata una delle aziende più importanti del settore.

MADE IN ITALY è il concetto che meglio riassume la filosofia di INOX MACEL: qualità top nei materiali, funzionalità e durata nel tempo, design italiano.

INOX MACEL was founded in the early 80's, when the Salvi family began offering products aimed at small and large butchers. Already in the first years the company expanded its business beyond national borders. The production line soon expanded: trays, containers, articles for ice-cream shops and more. A continuous evolution that brought INOX MACEL to a steady growth over the years. With connections developed at the most important fairs and shows in Italy, Europe, Asia and America, INOX MACEL is active in every continent, and can be considered one of the most important company in the sector.

MADE IN ITALY is the concept that summarizes best our corporate philosophy: high quality materials, durability, Italian design.

CERTIFICAZIONI: L'azienda INOX MACEL è certificata ISO9001:2015 per la progettazione e produzione di articoli atti al contatto con gli alimenti. NSF certifica la qualità dei prodotti, che sono rigorosamente testati nei laboratori CSI secondo tutte le norme di legge italiane ed europee.

ESTERO: La rete di vendita è costituita esclusivamente da importatori-distributori sia in Italia che all'estero. I prodotti Inox Macel sono distribuiti nei migliori hotel, ristoranti, supermercati all'ingrosso in tutto il mondo.

CERTIFICATES: Our company is certified ISO9001:2015 for design and production of goods intended for food contact. NSF certifies the product high quality, while CSI independent laboratories rigorously test them accordingly with all Italian and EU rules and regulations.

OVERSEAS: Our sales network is made of importers/ distributors in Italy and abroad. INOX MACEL products are distributed to the best hotels, restaurants, wholesalers around the world.

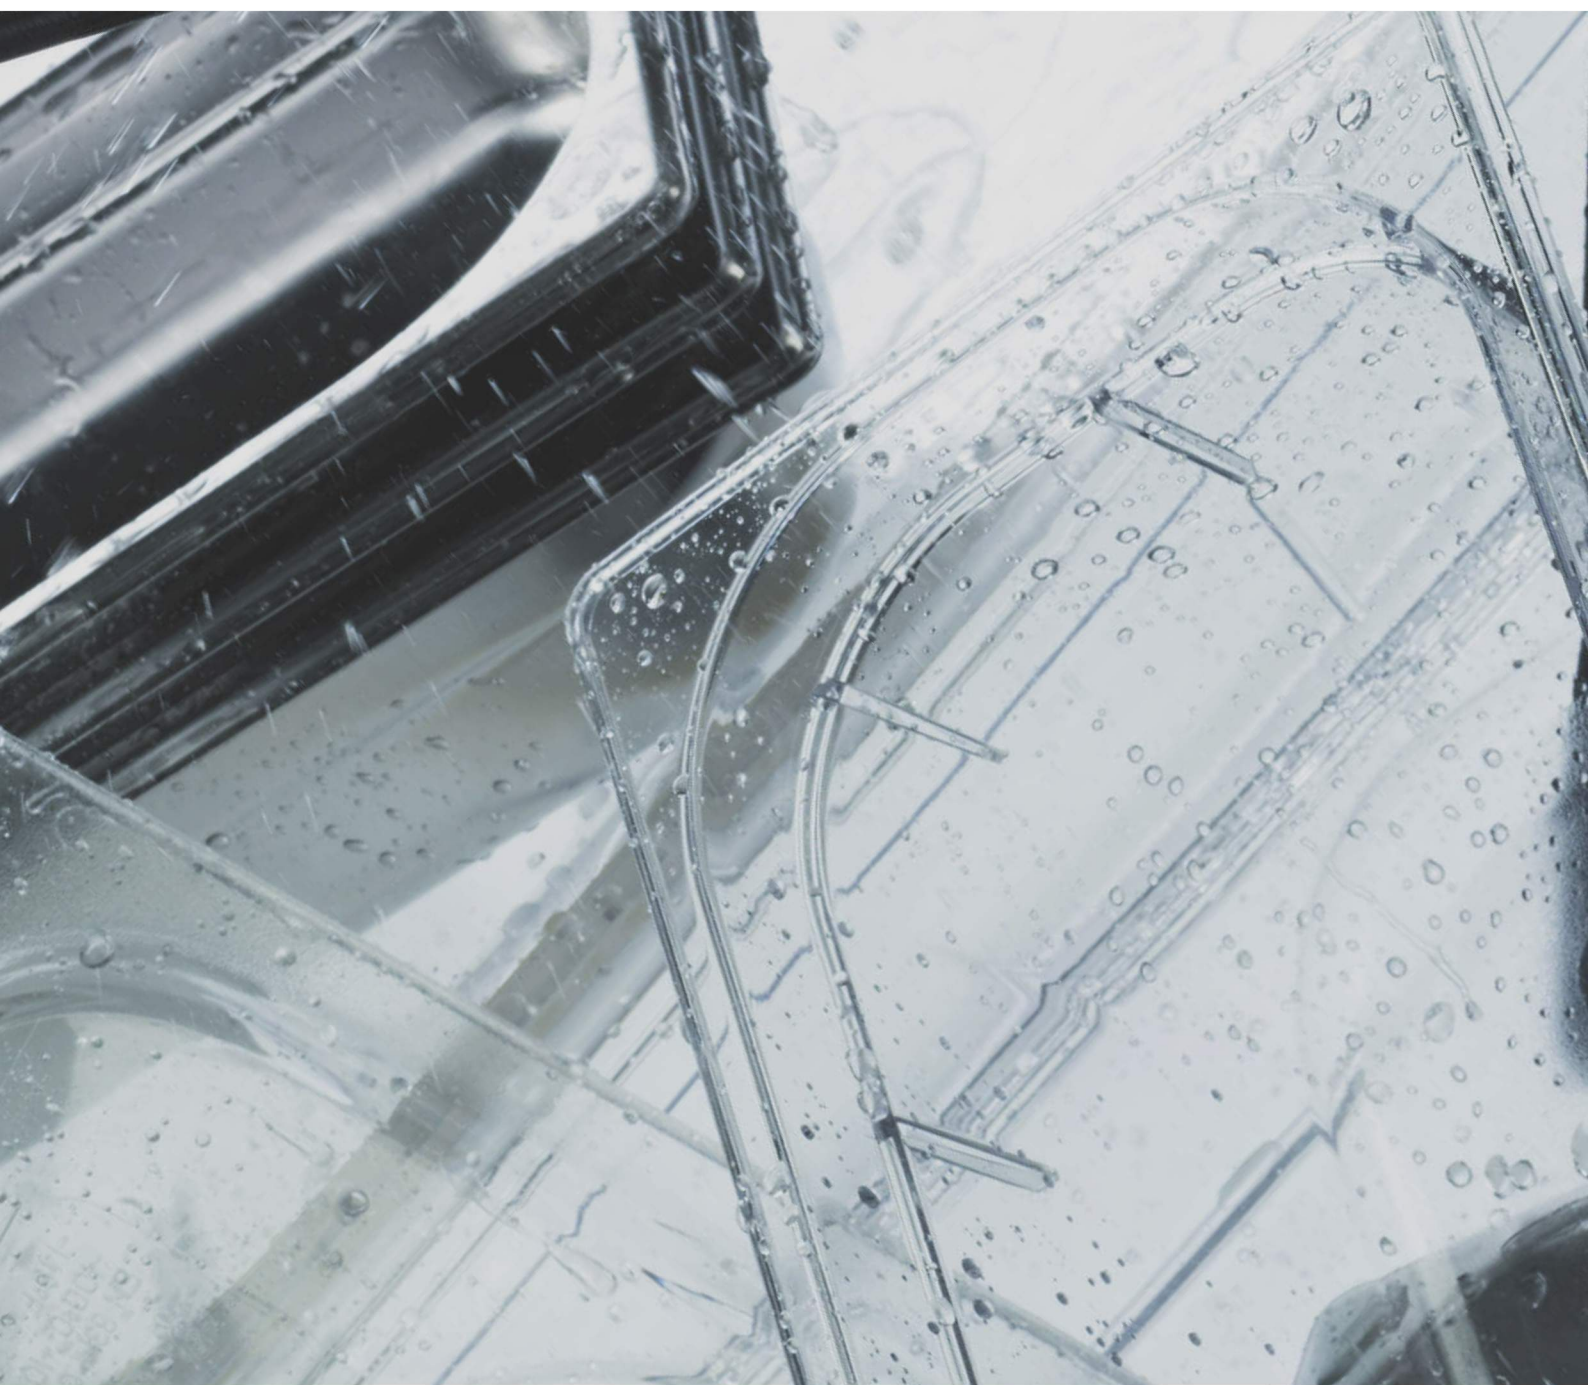

See www.nsf.com for additional info and the complete list of certified products

ira INOXMACEL

QUALITY IN ONE EASY PACKAGE

Jedes Mal, wenn eines unserer Produkte verwendet wird, wird seine Leistungsfähigkeit auf die Probe gestellt. Aufgrund ausgewählter Materialien höchster Qualität ist es beständig sowie widerstands- und anpassungsfähig. Doch das ist nicht alles: es muss so konzipiert, erprobt und zertifiziert sein, dass es auf lange Sicht in ständigem Kontakt mit Nahrungsmitteln stehen kann. Und letztlich muss es auch gut aussehen! Das Design von Artikeln, die dem täglichen Gebrauch dienen, können die positive Sichtweise Ihrer Kunden auf Ihr Unternehmen beträchtlich beeinflussen. Und Ihnen selbst wird es auch Vergnügen bereiten, mit diesen kleinen Meisterwerken zu arbeiten. Solche Qualitätsarbeit kann nicht kopiert werden. Solche Qualitätsarbeit kann mit einem Schlagwort zusammengefasst werden: **MADE IN ITALY**. **MADE IN ITALY** steht für Qualität. **MADE IN ITALY** steht weltweit für Top-Design. Und nicht durch Zufall steht **MADE IN ITALY** für eine Legende in der Küche!

*Each time it's used, our product is called to a performance. It must not only have strength, elasticity and durability bestowed by selected materials of the highest quality; but it must be designed, approved and certified to stay all the time in contact with food. And last but by no means least... it must be cool! The design of objects that are for every day use will give an important, positive impression on your customers view of your business. And you will also enjoy handling... these small works of art. All these qualities can't be copied. All these qualities can be summed up into one concept: **MADE IN ITALY**. **MADE IN ITALY** means the culture of quality. **MADE IN ITALY** means top-design throughout the world. Not by chance **MADE IN ITALY** means... a legend in the kitchen!*

INOX MACEL unterstützt die Arbeit des CateringProfis: vom kleinsten Zubehör bis zu den wichtigeren und auffälligen Elementen, die Sie öffentlich präsentieren können: Haken, Tablett, Gastronorm-Behälter, Eiszubehör, Körbe für Spülmaschinen, Spülen, Wagen und Geschirr. In jedem Bereich ... Spitzenleistung und Stil.

INOX MACEL supports the efforts of catering professionals: from the smallest accessories to the more important and flashy items to show to the public. Hooks, trays, Gastronorm containers, ice-cream tools, racks for dishwashers, sinks, trolleys and tableware. In every specialty... the top performance and style.

GASTRONORM 01

Gastronorm

Hohe Qualität, solide und langlebig dank der erhöhten Dicke (kann zwischen 0,7 und 1 mm variieren) und der Verwendung von Edelstahl Aisi304. Dieser Stahl, im Handel bekannt als 18/8 oder 18/10, beinhaltet zehnmal mehr Nickel als Produkte geringer Qualität; dadurch ist er korrosionsbeständig und resistenter gegen Beschädigungen durch aggressive aber übliche Substanzen wie Salz und organische Lösungsmittel, die in Spülmitteln enthalten sind. Die Produktion wird durch eine Elektrolyse in Säure abgeschlossen, was normalerweise chirurgischen Instrumenten vorbehalten ist. Durch ihr präzises Design sind diese Gastronorm-Behälter eine gute Wahl für die Präsentation von Speisen und sehr praktisch für die Küche: die Stapelschulter an der Seite ermöglicht das Stapeln, ohne dass die Behälter sich ineinander verhaken, während die engen aber glatten Radien zur Verbesserung der Kapazität und einer leichteren Reinigung beitragen. Sie sind hitze- und kältebeständig (-40°C, +300°C) und können somit im Ofen, Bain Marie, zur Aufbewahrung und zum Transport von heißen Speisen benutzt werden. Dank der Verwendung von qualitativ hochwertigen Rohstoffen sind sie ideal für eine dauerhafte Benutzung: sie sind vollständig geruchs- und geschmacksneutral, korrosionsbeständig und fürchten wiederholtes Reinigen in der Spülmaschine nicht. Sie entsprechen den Standardnormen EN631 und sind von NSF zertifiziert, dem bekanntesten Qualitätszeichen auf dem amerikanischen Markt.

High quality, solid and made to last, thanks to the increased thickness (can vary from 0.7 to 1mm) and the use of stainless steel Aisi304. This steel, commercially known as 18/8 or 18/10, contains up to 10 times more nickel than low quality products; this makes it resistant to corrosion and damages caused by aggressive, but common agents like salt and organic solvents included in detergents. The production is completed by electrolysis cleaning in acid, a special procedure normally reserved for surgical instruments. The accurate design makes these Gastronorm containers a great choice for the presentation of food and very practical for the kitchen: the stacking collar on the side lets you stack them without getting them stuck inside each other, while the tight but smooth radiuses improve capacity and make them easy to clean. Resistant to high and low temperatures (-40°C, +300°C), they can be used in the oven, bain-marie and to stock or transport hot food. The use of high quality raw material makes them ideal for prolonged use: completely odourless and flavourless, they don't fear corrosion and repeated washing cycles in the dishwasher. They comply fully with standard EN-631 norms and they're certified by NSF, the best known quality mark in the American market.

MIT ERHABENEM RAND

With raised rim

MIT FLACHEM RAND

With flat rim

Robust, stark und unzerstörbar. Ein perfekt aufeinander abgestimmtes "Team" und somit ein ... Gewinnerteam! GASTRONORM ist eine Reihe von austauschbaren und stapelbaren Produkten: Einigkeit macht stark.

Robust, strong and indestructible. A "team" with a perfect range and above all a winner! Gastronorm is a series of interchangeable and stackable products: unity is strength.

GASTRONORM-BEHÄLTER AISI304 MIT STAPELSCHULTER

AISI 304 GASTRONORM CONTAINERS WITH STACKING COLLAR

AISI304 EDELSTAHL GASTRONORM TECHNISCHE EIGENSCHAFTEN

AISI304 SST GASTRONORM TECHNICAL FEATURES

DIE STAPELSCHULTERN AN DEN WÄNDEN ERMÖGLICHENEINFACHESSTAPELNUNDENTSTAPELN DER BEHÄLTER OHNE RISIKEN. KOMBINIERBAR MIT UNSEREN GASTRONORMBEHÄLTERN AUS POLYCARBONAT. ELEKTROLYTISCHES BAD FÜR ALLE BEHÄLTER MIT DEN HÖHEN 150 UND 200 ODER ALTERNATIV FÜR ALLE ANDEREN GRÖSSEN; DIE ELEKTROLYSE, DIE TYPISCH FÜR CHIRURGISCHE INSTRUMENTE IST, SORGT FÜR EINE GLÄNZENDERE UND GLATTERE VERARBEITUNG. HERGESTELLT IN AISI304, UM MAXIMALE KORROSIONSBESTÄNDIGKEIT ZU GEWÄHRLEISTEN, HOCHWERTIGER EDELSTAHL PERFEKT FÜR LEBENSMITTELKONTAKT. JEDES STÜCK WIRD ZUM SCHUTZ DER OBERFLÄCHE UND SAUBERKEIT EINZELN KONTROLLIERT UND VERPACKT.

The stacking collars on the walls allow to easily stack and unstack the containers without risks. Compatible with our Gastronorm polycarbonate containers. Electrolysis bath for all the height 150 and 200 containers or alternatively for the other sizes; the electrolysis, typical for surgical instruments, ensures a shinier and smoother finishing. Made in AISI 304 to ensure maximum resistance to corrosion, a high quality genuine steel perfect for food contact. Every piece is checked and packed in bags one by one to preserve the surface and the cleaning.

DECKEL MIT SILIKONDICHTUNG TECHNISCHE EIGENSCHAFTEN

SILICON LIDS TECHNICAL FEATURES

DIE DICHTUNG IST BIS 170°C BESTÄNDIG;
SIE IST NICHT FÜR DAS KOCHEN MIT ÖL
UND ANDEREN VERDAMPFTEN FETTEN
BEI HOHEN TEMPERATUREN GEEIGNET,
DA SIE DADURCH GESCHWÄCHT
WERDEN KÖNNTE.

Gasket resists up to 170°C; not meant for
cooking at high temperatures with oils
and other vaporised fats, as they might
weaken the gasket

BEHÄLTER FÜR EIS 02

Ice cream basins

Diese Behälter aus Edelstahl Aisi304 (18/10) und Polycarbonat bilden zusammen eine umfassende Produktlinie mit einer Vielfalt an Größen und Kapazitäten und werden somit allen Anforderungen und Standards gerecht. Sind ideal für das Aufbewahren und Präsentieren von Eis in Eisdieleen und Konditoreien. Die abgerundeten Kanten erleichtern die Handhabung, während der enge aber glatte Radius die Kapazität verbessert und das Reinigen erleichtert. Als Zubehör dienen die Eisportionierer mit farbigen Griffen sowie die eleganten und vollständig transparenten Deckel aus Polycarbonat, die das Eis konservieren und gleichzeitig seiner Präsentation dienen.

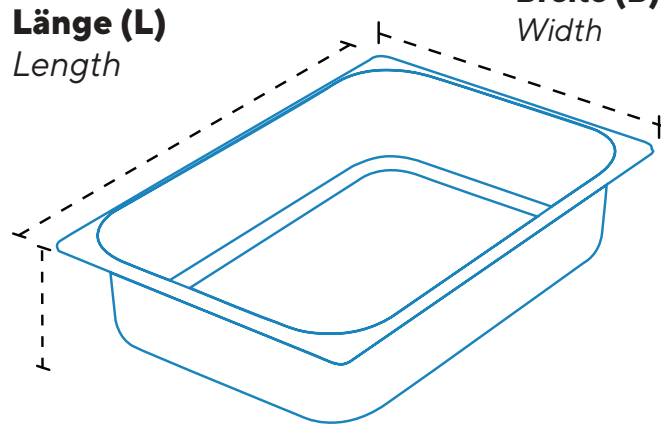

Made of stainless steel Aisi304 and polycarbonate, together they form a complete, diverse line with a variety of measures and capacities, satisfying all kinds of requests and standards. Ideal for preserving and showcasing ice cream in gelato parlours and pastry shops. The rounded edges facilitate ease of handling, while the tight but smooth radiuses increase capacity and make them easy to clean. They are supplemented with accessories, like spatulas with coloured handles and elegant, perfectly transparent polycarbonate lids, devised to preserve and showcase at the same time the ice cream.

TABLETTS UND BEHÄLTER 03

Containers and trays

In diesem Abschnitt finden Sie eine große Auswahl an Behältern aus Edelstahl, wenn Sie auf der Suche nach anderen Maßen als denen der klassischen Gastronorm-Standards sind. Die hochwertigen und glänzenden Behälter mit handpolierter Oberfläche wurden für die Auslagen und Betriebe von Metzgereien, Bäckereien und Konditoreien entwickelt. Sie wurden selbstverständlich für den intensiven Gebrauch konzipiert und sind daher überaus robust und aus Edelstahl AISI304 hergestellt, um den besten Schutz vor Korrosion, Verschleiß und Flecken durch Fleisch und andere Lebensmittel zu gewährleisten. Der enge Radius und die schlichte Form verbessern die Kapazität und erleichtern das Reinigen. Diese Produktlinie wird durch die Edelstahlgitter zum Abgießen von Lebensmitteln komplettiert.

In this section you will find a vast choice of stainless steel containers and trays, for when you're looking for different measures than the classic Gastronorm standard. Well-finished, shiny and with great attention to detail, thanks to the hand-made polishing, they're designed to furnish showcases and laboratories of butchers, bakeries and patisseries. They are, of course, developed for intense use: remarkably robust, they're all made in stainless steel Aisi 304, in order to offer the best resistance to corrosion, wear and stains caused by processing meat and food in general. The tight but smooth radius improves capacity and makes them easy to clean. This line is completed by the stainless steel grids, used to drain the food.

GESCHIRR 04

Tableware

Es ist farbig oder transparent und wurde über die Jahre hinweg aus Plastik hergestellt, weil nur so die immer größer werdende Nachfrage nach sicheren, handlichen und bequemen Produkten erfüllt werden kann. Gläser, Krüge, Teller, Tellerglocken und Tablett... sie sind der ideale Ersatz für zerbrechliche Materialien wie Keramik oder Glas, vor allem in Diskotheken, Kneipen, Schwimmbädern, Krankenhäusern und öffentlichen Gebäuden generell. Dadurch dass sie so stabil und schwer kaputt zu machen sind, sind sie nicht so gefährlich. Außerdem bieten sie ein gutes PreisLeistungs-Verhältnis im Vergleich zu anderen Materialien. Sie sind spülmaschinenfest und haben außen eine gefräste Oberfläche, die besseren Halt bietet und Kratzer verbirgt. Innen erleichtern die glatte Oberfläche und nicht vorhandene Ecken das Reinigen. Transparent wie Glas oder in hellen Farben passen sie in jede Situation.

Colourful or transparent, they were created over the years to answer the ever growing demand for safe, handy and convenient products that only plastic can provide. Glasses, pitchers, plates and plate-covers, trays made of plastic; these are the ideal substitutes for fragile materials like ceramic or glass, especially in clubs, pubs, swimming pools, hospitals and open spaces in general, thanks to the fact that they're so hard to break, and not as dangerous. On top of that, they also offer value for money when compared with traditional materials. Developed to be "easy": on the outside, milling surfaces offer a better grip and hide scratches; on the inside, the smooth surfaces and lack of corners make them easy to clean. They're also dishwasher safe. Transparent like glass or in bright colours, they fit in all situations.

SPÜLEN 05

Sinks

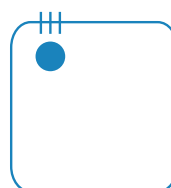

Die Spülen aus Edelstahl Aisi304 sind für jede Küche oder Produktion geeignet. Edelstahl ist rostfrei, fleckenresistent und verträgt die aggressivsten Reinigungsprodukte sowie größte Hitze und Temperaturunterschiede. Sie sind elegant und glänzend. Dank ihres klassischen und klaren Designs sind sie einfach zu reinigen und der enge Radius erhöht ihre Kapazität. Die Stärke und Reinheit des verwendeten Rohstoffes garantiert Hygiene und Verschleißfestigkeit. Auf Anfrage sind alle Kombinationen von Abfluss- und Überfluslöchern sowie passendes Zubehör erhältlich.

Apt for any kitchen or production, the stainless steel sinks are made in Aisi304, the best material to insure a total resistance to rust, stains and the most aggressive cleaning product, and to high temperatures and related surges. Elegant and shiny, with a classic and smooth design that makes them easy to clean and tight radius for a better capacity. The strength and purity of the raw material used guarantees hygiene and resistance to wear over time. On request, all possible combinations of bottom holes and overflows and related accessories are available.

SERVIERWAGEN 06

Trolleys

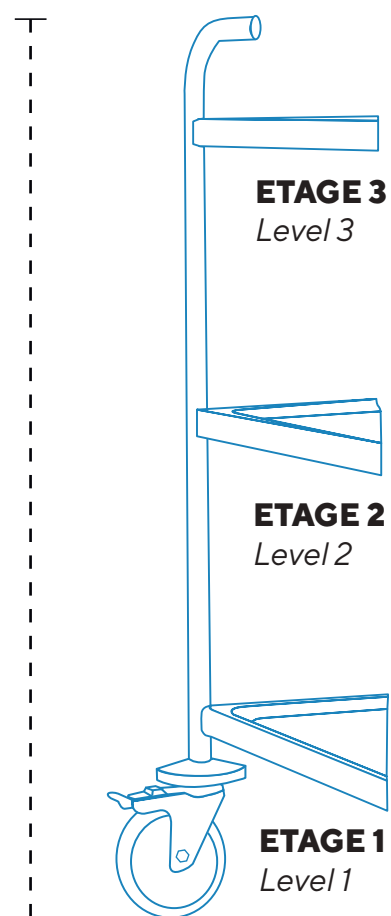

Eine große Auswahl an exzellenten Servierwagen, die sich für den Transport aller typischen Produkte von professionellen Küchen eignen: GastronormBehälter, Tabletts, Spülmaschinenkörbe und 60x40 Behälter. Wir sind so flexibel, dass wir auch kundenspezifische Modelle anfertigen können. Die Produkte aus massivem Edelstahl Aisi304, dem besten Material für Hygiene und Resistenz, sind angefertigt, um beträchtliche Lasten von bis zu 100kg und mehr zu tragen. Sie sind bereits verschweißt oder platzsparend verpackt erhältlich. Außerdem gibt es eine große Auswahl an Zubehör und anderen Details: schalldämpfende Räder aus Nylon oder Gummi, mit Bremsen oder Puffer, um Unebenheiten zu mildern; schalldämpfender Gummi unter jedem Boden, um Geräusche und Vibrationen zu vermeiden; glatte Oberflächen ohne versteckte Ecken oder scharfe Kanten für einfacheres Reinigen und bessere Sicherheit; Böden mit erhöhten Rändern, um das Hinunterrutschen von Dingen während des Transports zu verhindern.

An ample selection of excellent trolleys, tailor-made to transport all the typical products of a professional kitchen: Gastronorm containers, trays, dishwasher racks, 60x40 containers. We can offer total flexibility, to the point that we can produce customised models. Made only with solid, high thickness Aisi304 stainless steel (18/10), the best material for hygiene and resistance to wear; designed to easily carry substantial loads of a 100kg and more. Available as welded or to be built and flat-packed to save space, they come with a variety of accessories and care for details: soundproof wheels made of nylon or rubber, with brakes and buffers to soften bumps; sound-deadening rubber under each shelf to soften annoying noises and vibrations; smooth surfaces without hidden corners or sharp edges for easier cleaning and better safety; shelves with raised borders to stop things from sliding off during transport.

Load capacity among the highest in the market; 4 revolving soundproof wheels, Ø 125mm (two with
brakes). Customized models available.

HAKEN 07

Hooks

Der Ursprung von Inox Macel und seiner Produktionsgeschichte beginnt hier. Die Haken sind in vielen Formen und Varianten erhältlich und können kundenspezifisch angefertigt werden. Sie sind in Edelstahl Aisi420 oder 304 auf Anfrage verfügbar und eignen sich für hohe Ladung und aggressive Elemente der Fleischverarbeitung. Sie sind dank ihrer glatten Oberfläche und großen Dicke leicht zu gebrauchen. Sie können mit oder ohne spitzen Ecken angefertigt werden, je nach Wunsch und besserer Sicherheit. Die Serie wird durch typische Zubehörteile für Fleischereien komplettiert: von Knochensägen bis Fleischklopfer, von Spießen bis Zangen.

Inox Macel's origins and production history start here. The hooks are available in many forms and variants and they can be made to customer's design. Available in Aisi420 or 304 on request, they don't fear high loads and the aggressive elements typical of meat processing. Easy to handle thanks to the smooth surface and high thickness, they can be made with or without pointy ends according to desired use and better safety. The line is completed with the typical accessories needed in every butcher shop: from hacksaws to meat pounders, from skewers to pincers.

SPÜLMASCHINENKÖRBE 08

Racks

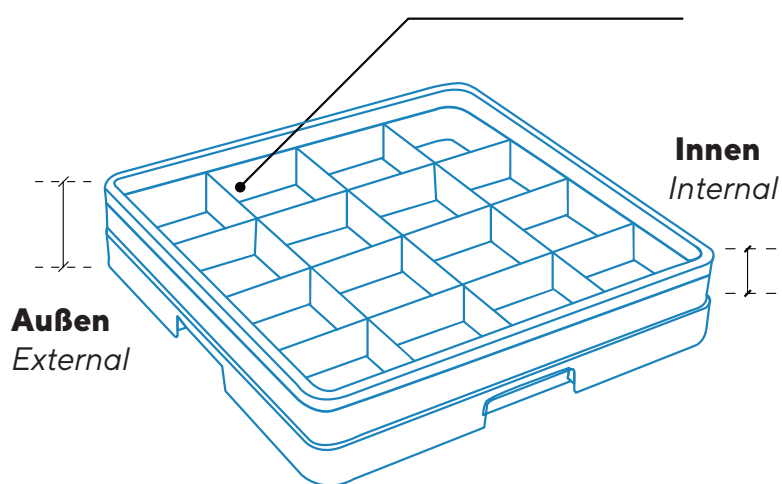

Sie sind robust, es gibt sie in verschiedenen Modellen und Größen und sie können alle Arten von Geschirr und Gläsern aufbewahren und transportieren. Die offenen Gitter an der Unterseite und den Seiten ermöglichen einen perfekten Wasserfluss während der Reinigung, ohne dabei Wasser zu verschwenden. Sie sind sowohl praktisch als auch mithilfe von Computersimulation getestet. Die Öffnungen erleichtern auch das Durchströmen von heißer Luft während des Trocknens, sodass der Inhalt gut belüftet und zugänglich für „frische“ Luft ist. Für die längerfristige Lagerung von Inhalt können die Körbe mit maßgefertigten Abdeckungen geschützt werden. Sie sind aus hochwertigem, lebensmittelechtem PP hergestellt, das leicht und robust ist, hygienisch und widerstandsfähig gegen Stöße, aggressive Chemikalien und Temperaturunterschiede (sogar bis 95°C): gegen alle professionellen, intensiven Waschvorgänge. Die Oberkante und die Form des Bodens eignen sich, die Körbe einfach und stabil zu stapeln. Die eingebauten Griffe, glatten Oberflächen und abgerundeten Ecken machen sie sicher und einfach zu handhaben; der Transport wird durch die maßgefertigten Wagen, mit oder ohne Griffe, erleichtert.

Robust professional polypropylene racks of different models and sizes to wash, store and transport any sort of dishes and glasses. The open "grids" on the bottom and the sides are designed to allow a perfect flow during washing, for a better result without wasting water; they're tested on the field and with computer simulations. These openings facilitate the circulation of air, useful while drying and to keep the content "fresh". To store the content for a long time, the racks can be protected by external agents with our tailor-made cover and lid. Made with high quality, food contact safe polypropylene, the best material for a product that needs to be both light and strong, hygienic, and resistant to impacts, chemicals and temperature surges (even up to 100°C): all typical of a professional dishwasher and its intense washing cycles. The upper edge and shape at the bottom are made to stack them easily and firmly on each other. The incorporated handles, smooth surfaces and rounded corners make them safe and easy to handle; transport is made easy by the customized trolleys, with or without handles.

DIE GRÖSSE ZEIGEN SIND DIE EXAKTE GRÖSSE DER FÄCHER. ZUR LEICHTEREN HANDHABUNG EMPFEHLEN WIR, DIE GLÄSER IN FÄCHER ZU STELLEN, DIE ETWAS GRÖßER ALS DER GLASDURCHMESSER SIND

The measurements shown are of the exact size of each compartment. For easier handling, we recommend to place the glasses in compartments that are a bit bigger than the glass diameter.

INOX MACEL wurde in den frühen 80er Jahren gegründet, als die Familie Salvi begann, ihre Produkte gezielt kleinen und großen Metzgereibetrieben anzubieten. Bereits in den Anfangsjahren vergrößerte sich das Unternehmen über die Landesgrenzen hinaus. Die Produktpalette erweiterte sich ebenfalls: Tablett, Behälter, Artikel für Eisdielen und vieles mehr; eine kontinuierliche Weiterentwicklung hat der Firma über die Jahre zu einem konstanten Wachstum verholfen. Auf den wichtigsten Messen der Branchen in Italien, Europa, Asien und Amerika konnten wertvolle Beziehungen geknüpft werden, aufgrund derer sich INOX MACEL als eine der wichtigsten Firmen auf dem Sektor weltweit etablieren konnte. MADE IN ITALY ist das Konzept, das die Philosophie von INOX MACEL am besten zusammenfasst: Top-Qualität der Materialien, Funktionalität, Dauerhaftigkeit und italienisches Design.

INOX MACEL was founded in the early 80's, when the Salvi family began offering products aimed at small and large butchers. Already in the first years the company expanded its business beyond national borders. The production line soon expanded: trays, containers, articles for ice-cream shops and more. A continuous evolution that brought INOX MACEL to a steady growth over the years. With connections developed at the most important fairs and shows in Italy, Europe, Asia and America, INOX MACEL is active in every continent, and can be considered one of the most important company in the sector.

MADE IN ITALY is the concept that summarizes best our corporate philosophy: high quality materials, durability, Italian design.

ZERTIFIZIERUNGEN: INOX MACEL ist zertifiziert ISO9001:2015 für die Planung und Produktion von Artikeln, die mit Lebensmitteln in Berührung kommen. NSF zertifiziert die Qualität der Produkte, die strengstens in den CSI Labors gemäß aller Normen des italienischen und europäischen Rechts getestet werden. AUSLAND: Das Verkaufsnetz besteht aus Importeuren/ Verteilern sowohl in Italien als auch im Ausland. Die Produkte INOX MACEL werden in den besten Hotels, Restaurants und Großmärkten weltweit eingesetzt.

CERTIFICATES: Our company is certified ISO9001:2015 for design and production of goods intended for food contact. NSF certifies the product high quality, while CSI independent laboratories rigorously test them accordingly with all Italian and EU rules and regulations.

OVERSEAS: Our sales network is made of importers/ distributors in Italy and abroad. INOX MACEL products are distributed to the best hotels, restaurants, wholesalers around the world.

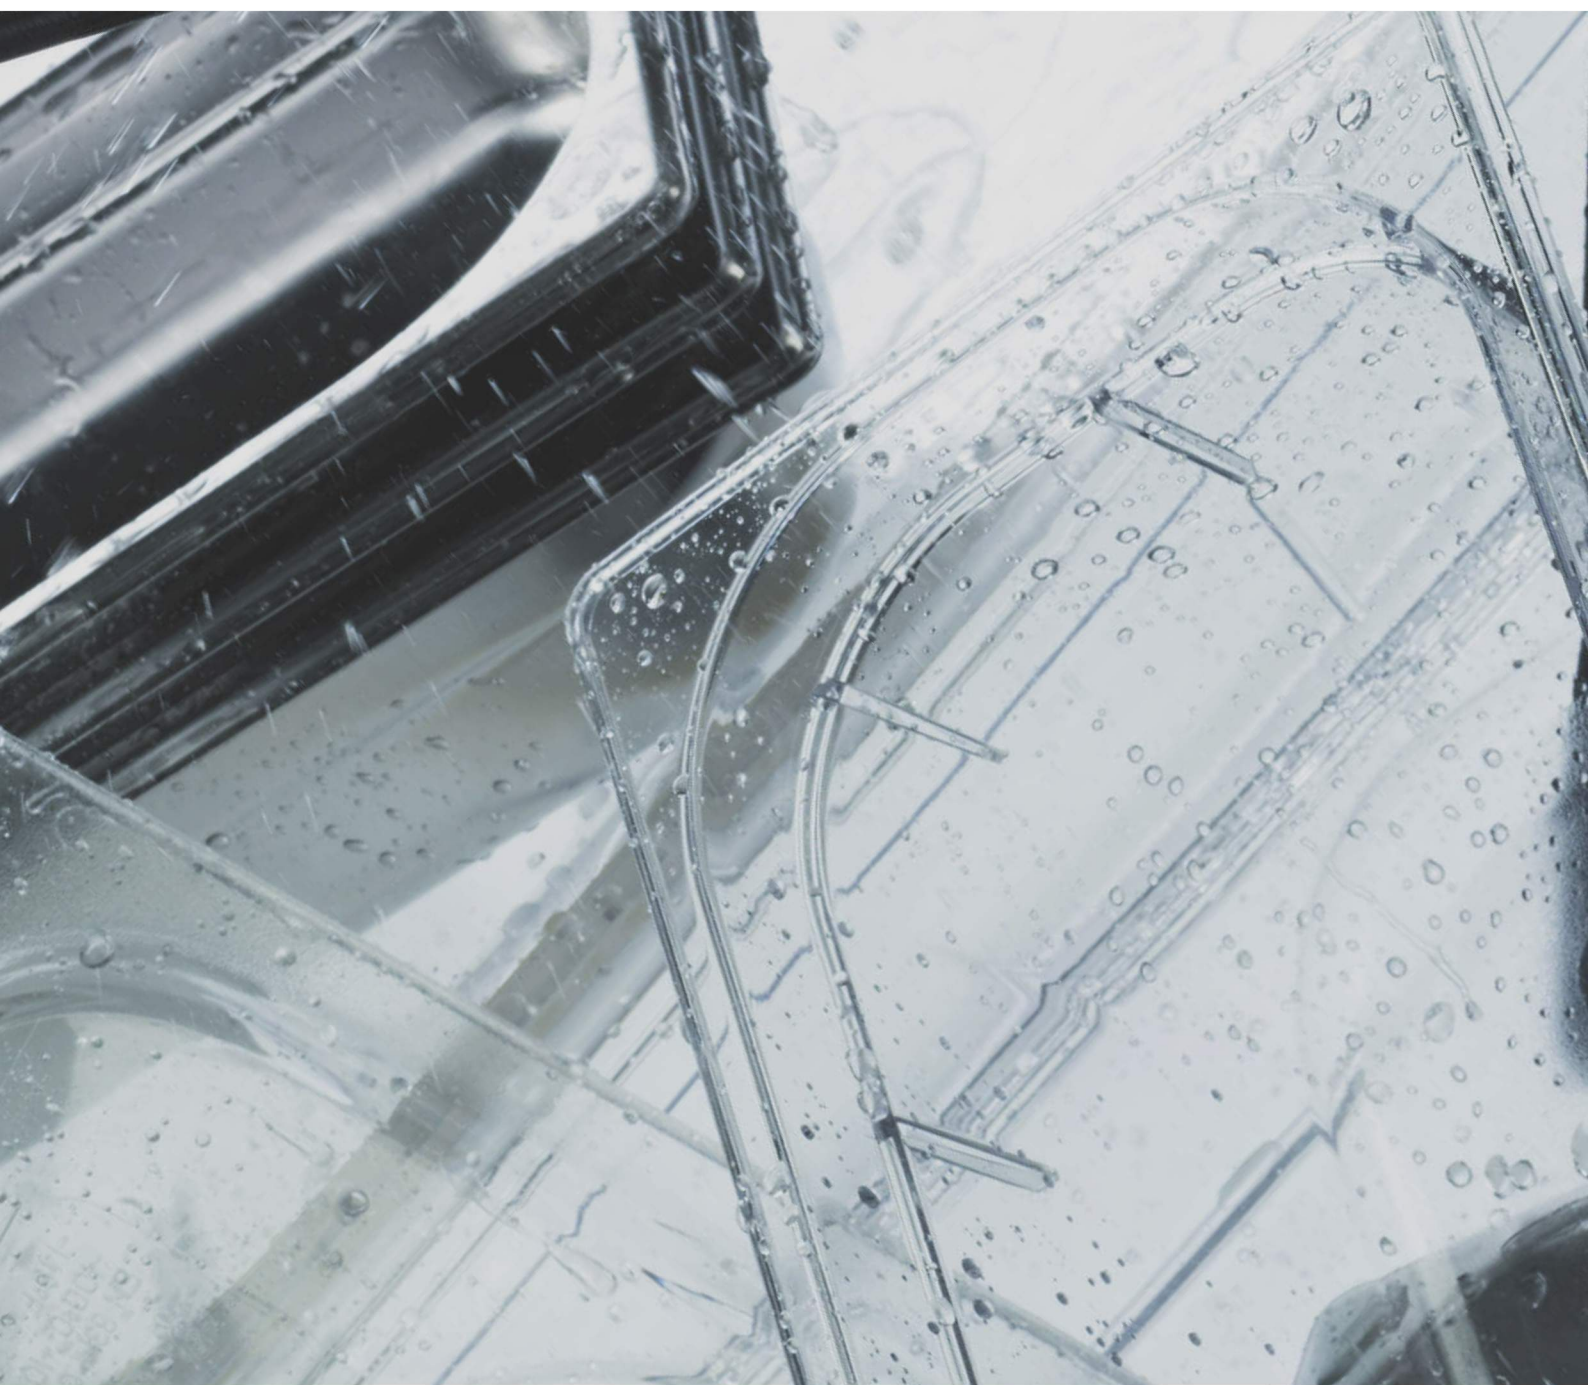

See www.nsf.org for additional info and the complete list of certified products
